

Please protect the Do Not Call list as established by NJ law. Before the list went into effect, it was not unusual to receive 10 or more calls a day just in the hhafter-work hours. This is added to claas from friends and family and legitimate business calls. It was not unusual to receive upward of 30 calls. I have a chronic health problem and it is difficult to sustain the energy required just to go to work and care for my family each day. I do not need to be pesterd by people who want to sell me vinyl siding and replacement windows for my historic Victorian home. Please allow the list to remain the way it was enacted. Thank you.

Debra Schaefer
